## ■ Farm in Klon

We are very pleased that you showed interest in Polish Pheasant "Bazanty" *Phasianus colchicus*, precisely selected and bred on our farm.

We invite you to get acquainted with the information and offer of our farm. Polish Pheasant has been selected and bred in Klon for years. It enjoys the highest recognition among customers and it can be also supplied to your hunting area.

The indisputable advantages of Polish pheasants from Klon are such as: strength, vitality, beautiful appearance and incredible volatility.

Cooperation with us is a guarantee of the highest quality and genetic purity. Our transport will deliver hatching eggs, chicks, young and adult pheasants to any country in Europe, in comfortable conditions, always punctual at the indicated address.

## ■ About us

Pheasant breeding is our family passion. Our goal is to breed beautiful, strong and vigorous birds that released from aviaries, will quickly adapt to conditions of the natural environment. The first pheasants from our farm were introduced in autumn 2003. Over the next years, we have expanded our farm, continuously investing in the infrastructure and the welfare of farmed pheasants. Early on

we aimed at breeding Polish Pheasants – Polskie Bazanty - the race of common pheasants which lives in the wild and is shaped by the climate of our country. Genetic purity of pheasants from Klon is our greatest treasure, which we have nourished and nurtured for many years.

**Bazanty** are the only birds that we breed. They are primarily dedicated to introduction into the natural environment and hunting. Our farm is capable of breeding and selecting family stocks, which are able to adapt on the hunting ground, hatch eggs and breed chicks during the breeding season. High quality and genetic purity is our main goal.

Our farm is located in a quiet and peaceful area in Klon in the district of Czajków. The surrounding area

is a natural habitat for pheasants. Climate in Klon favors pheasant breeding. Our farm is supported by modern infrastructure, which consists of rearing facility, cage system, large format aviaries and high-tech incubators. The development of farm and farming itself requires tremendous work, but only thanks to our commitment, we can state that our farm is a well-organized place. The feedback we get from our customers, farmers and other farm visitors confirms this statement.

## ■ Bazanty – Polish Pheasant

Polish Pheasant bred in Klon is widely known and respected in many hunting areas throughout Europe. Polish pheasants are the telltale mark and the guarantee of a successful hunt. Each year we export thousands of pheasants and hatching eggs to other European countries where the hunting of these birds is popular. We are extremely pleased that birds from our farm are so highly appreciated.

### Genetic features of pheasants bred in Klon:

- **Strength** – a proper body built
- **Lifetime** - birds are vivacious and agile
- **Plumage** - beautiful appearance, suitable colors
- **A clear white ring around the neck**
- **The extraordinary volatility** - pheasants fly perfectly, the flight is distinctively high and long.

In order to obtain and regularly strengthen the desirable qualities, it is required to select and exchange the genetic material of family stocks. We must be sure that the pheasants selected for

family stocks, meet all the criteria. Besides genetic traits, there are also other crucial things like the technique of rearing, toughening and growing up in appropriate conditions: high and large aviaries.

## ■ Offer

We offer the highest quality Polish Pheasants at all ages and hatching eggs. We provide complete service to hunting clubs in the range of bird introduction and hunting supplies. We offer top quality birds.

- **Polish Pheasant Eggs** - strictly selected hatching eggs come from our family stocks. They are bred and maintained at our farm, which guarantees pure-breeding and the adequate exchange of genetic material. Pheasants are held in cage systems and aviaries.

We can supply up to 50 000 eggs per week in the period from March to July. We can arrange the delivery dates, special packaging and professional transport to any place in the world.

- **Day-old chicks of Polish Pheasant** - we can deliver up to 24 000 chicks at one time. They are all bred at our farm in Klön. Delivery time and transportation throughout Europe can be freely established. We can also provide any vaccinations of birds before the release from the hatchery.

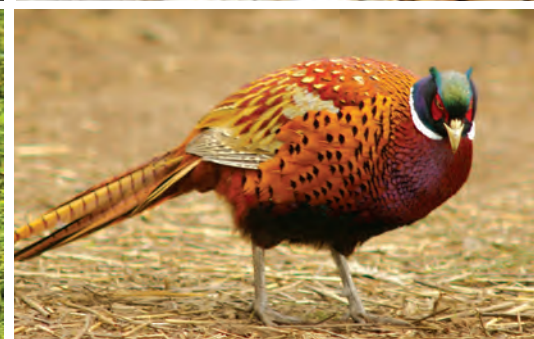

- **6-week Poults Polish Pheasants**- ideal material for introduction at hunting area. Delivery time and transportation to any country in Europe can be freely established. We offer a professional, legalized transport in batches 2000, 3 000, 5 000 or 12 000 pieces. The arrival time and the type of boxes can be negotiated.

- **Adult Polish Pheasants at any age** - delivered to any hunting area. We provide a full veterinary documentation and convenient transportation throughout Europe. Foreign transportation in quantities of 500, 1 500, 3 000 and 10 000 pieces. Any kind of boxes or disposable cartons can be chosen.

We can help you in settling birds in the pheasants natural habitat and we will deliver them with any gender configuration to any European country.

We are looking forward to co-operate with you

## ■ Transport

In order to achieve the desired quality of pheasants and meet high expectations, it is needed to be professional and to ensure care at each stage of breeding.

The extraordinary care and attention are both needed during working with reproductive stocks, incubation and rearing time. All this effort is irrelevant if the adequate transportation is not provided.

Eggs and pheasants are often transported for a very long distances. So as to meet the expectations and to deliver birds in a good shape to Great Britain

or France, it is required to use specially equipped vehicles and appropriate personnel.

All of our vehicles are equipped with a satellite positioning system, ventilation and drinking system, which enable legal and easy transportation on any route. Our drivers are certified for a long-term transport of animals.

We have experience and knowledge about the transportation of pheasants. We know how to pack and how to organize transportation to make sure, that 100% of the birds will arrive in good condition.
